Soilfloc® C-THRU

Soilfloc® C-THRU

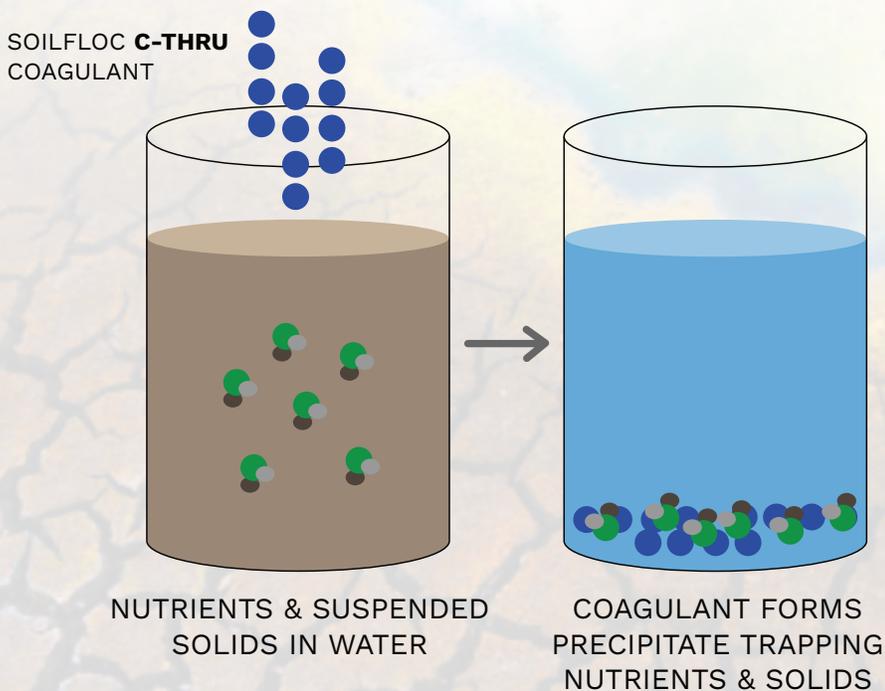

WATER CLARIFICATION COAGULANT

Product Description:

Soilfloc® C-THRU (liquid formula) is a high purity, powerful, liquid coagulant developed specifically for water treatment. C-THRU is designed to be metered into your water with a pump, and then circulated throughout the water, providing crystal clear, algae-free water**.

C-Thru the Murk! This powerful coagulant works by neutralizing the charge of the "murk" (dispersed, non-settleable solids and nutrients). Once neutralized, the small, suspended particles can stick together, forming larger clumps that are capable of settling. The suspended particles that cause the "murk" also provide the footing on which algae blooms and bacteria grow, by removing the "footing" (dropping the solids), the likelihood of blooms is greatly reduced.

WATER CLARIFICATION COAGULANT

TYPICAL PROPERTIES

Appearance
Opaque Liquid

PACKAGING AVAILABLE

5 Gallon Jugs
Drums
275 Gallon Totes

APPLICATION RATES **	DOSAGE
METERING PUMP	10 PPM

**These are only provided as starting points. Rates will vary according to conditions.

**Speak to a technical sales representative to discuss your unique water feature.

**C-Thru must be properly dispersed throughout the water column to promote the particle collisions needed for them to stick together to form larger, settleable particles. Over-mixing will not affect the "coagulation", but insufficient mixing will not allow the collisions needed to form clumps that are large enough to settle.
