

Erosion Control

State of the Art Erosion Control Products

Stabilizing, reinforcing, or restoring soils requires effective erosion control products. You can rely on Aqua Ben to provide state-of-the-art polymer products that are efficient and cost-effective.

We find the right solution to your problem in a reliable, cost-effective manner.

Our Soilfloc® and Hydrosorb polymers are perfect for banks, slopes, hillsides, or channels controlling sediment to reinforce the surrounding areas until vegetation becomes established.

Aqua Ben's SoilFloc® products come in a variety of different types and container sizes to meet all of your needs.

Soilfloc® keeps the soil where it belongs and not down the drain.

Contact Aqua Ben for more information.
