

Soilfloc Sealant

Soilfloc Sealant is the most efficient polymer based sealant available for your Earthen canal, irrigation ditch or pond. Specifically designed to find leaks, whether in the floor, the wall or through rock formations and seal them. Soilfloc custom blends linear and cross-linked polymers to seal any type of soil, for any sized project.

From small decorative ponds to miles of irrigation canals, Soilfloc is the most cost effective solution for your water loss problems.

BENEFITS INCLUDE:

- Cost effective
- No need to drain water
- Customizable
- Locates leaks and seals
- Non-toxic, biodegradable
- Environmentally Friendly
- Will not harm livestock
- Can be worked into dry soil during pond construction

INDUSTRIES WE SERVE:

- Golf Courses
- Mining Operations
- Private Pond Owners
- Irrigation Districts
- Public Pond & Canal Managers
- Pond Builders

Soilfloc Sealant is a non-toxic chemical two-part solution that saves valuable water and is one of the few options pond or canal owners have available to help avoid the high costs of rebuilding a leaking pond or installing expensive liners.
