

Hydrosorb

Anionic Superabsorbent Polymers

Making Your Water More Efficient

Hydrosorb products are anionic, polyacrylamide based superabsorbent polymers. When incorporated into a soil or substrate, HS absorbs and retains large quantities of water and nutrients. Unlike most products that become hydrated, HS is able to release the absorbed water and nutrients over time, as needed as a function of the absorption / release cycles.

Benefits:

- Saves on water, fertilizer and maintenance costs
- Improves moisture retention capacity of the soil
- Minimize stress during early plant development or transplanting
- Lengthen time between irrigation cycles
- Maximize applied fertilizer efficiently through reduced leaching
- Will not harm the environment

For Use In:

- Hydroseeding
- General Landscaping
- Turf and Sod
- Ornamentals, Container Gardening
- Tree installation and maintenance
- Agriculture

Packaging:

- 5-Gallon Plastic Pails
- 55 lb Double Lined Plastic Bags

Hydrosorb

Anionic Superabsorbent Polymers

Products Available:

- HYDROSORB 2001C (1-2 mm granule dry)
- HYDROSORB 2001F (0-1 mm granule dry)
- HYDROSORB 2001D (2-4 mm granule dry)
- HYDROSORB 2001UF (<1 mm granule dry)

APPLICATION RATES

APPLICATION	RATE	PRODUCT
Hydroseeding	25-30 lb. / acre	HS 2001F
General Landscaping	1 lb. / 100 sq. ft.	HS 2001C
Turf and Sod	4 lb. / 1000 sq. ft.	HS 2001F
Ornamentals & Containers	1/3 oz. per 1 gallon pot	HS 2001C
Trees	1 oz. per ft. of height	HS 2001C
Agriculture furrow	20 lb. / acre	HS 2001C
