

Erosion Control & HydroSeeding

State of the Art Hydroseeding Products

Aqua Ben carries industrial hydroseeding products. We are the ideal supplier of hydroseeding and erosion control products for contractors. We can help keep you out of trouble with regulators by preventing run-off from your construction site. When you need top quality products you can rely on to get the job done right, choose Aqua Ben. Our Soilfloc PAM and Hydrosorb products are non-toxic, environmentally safe, and will not harm plants, shrubs, or animals. Get in touch with Aqua Ben's team. We can answer any questions you might have about any of our products.

HydroSorb 2001F Benefits include:

- Reduces watering frequency up to %50
- Helps prevent dry patches
- Aids in plant growth
- Reduces hydric stress
- Reduces labor & water costs
- Long lasting effects
- Non-phytotoxic
- Environmental safe
- Biodegradable

Industries we Serve:

- Public Works Departments
- Department of Transportation
- Contractors
- Environmental Restoration Groups
- Landscape Companies & More

Aqua Ben products come in a variety of different sized containers to meet all of your needs. Outperform guar-based tackifiers for less money.

HYDROSORB 2001F holds fertilizer just as it holds water. Therefore, you should reduce your fertilizer usage by up to 50% to avoid burning your plants. Because every soil has different characteristics, finding the optimum fertilizer rate requires adjustment of your standard method of application.
